

Setting the Pace for Efficiency

At Mitsubishi Electric, you won't believe what we've done now. We've designed the next generation of energy-efficient uninterruptible power supply systems. Our 9900B Series 750 kVA/750 kW UPS has unmatched performance and reliability, and will deliver impressive efficiency of up to 96.5%. Even at loads as low as 25%, the 9900B UPS is 94% efficient!

With its small footprint and lightweight design, the 9900B saves precious floor space. The precision engineering of the patented fully digital three-level converter and inverter combined with the use and control of our 5th generation IGBT (CSTBT - Carrier Stored Trench-Gate Bipolar Transistors) gives you the performance and reliability needed to protect your critical facility. Contact Mitsubishi Electric for details on the 9900B Series 750 kVA/750 kW UPS and our efficiency guarantee at 724.772.2555 or visit www.meppi.com.
